

## Product Bulletin

# Banditt II

### Description

Banditt II is an all-purpose solvent based degreaser that cleans a variety of industrial surfaces. It can be used to clean heavily soiled parts in agitated cleaning tanks or recirculating parts washers. Banditt II is also used in dip tanks following machining with oils to remove chips and potentially corrosive metalworking additives such as chlorine and sulfur. Banditt II is particularly useful in replacing mineral spirits based products because of its high flash point.

### Features and Benefits

- High flash point reduces fire hazard
- Removes tough soils including grease, tar and drawing oils
- Contains no chlorinated solvents
- Applicable on all metal surfaces

### Typical Properties

Appearance	Clear colorless liquid
Odor	Solvent
Bulk Density	6.5 lbs/gal
Specific Gravity	0.78 @ 70 °F
Flash Point	140 °F T.C.C.

### Application Procedure

Banditt II is used at full strength and is applied by spray, immersion or manually wiping. Removal of tough burnt on deposits may require some brushing or overnight immersion for complete removal. Heating of Banditt II is not generally recommended.

Consult Material Safety Data Sheet for a complete description of handling procedures prior to use.
