

# Kleen All

Kleen All is a solvent cleaner specifically formulated to efficiently remove uncured paint. Designed with a high flash point for safety, this cleaner is used to remove paint deposits in places such as paint booth steps, hallways, safety rails and other surfaces and equipment where a paint stripper would be inefficient or cannot be used. Use of Kleen All eliminates the need for flammable thinners. Because the product is emulsifiable in water it is easy to clean up after cleaning with a water rinse.

## Features and Benefits

- Can be applied by rag, brush or spray gun
- Designed to be easily water rinsable
- Contains no suspect carcinogens
- High flash point of 145 °F

## Typical Properties

Appearance	Clear liquid
Bulk Density	7.5 lbs/gal
Specific Gravity	0.90 @ 70 °F
Solubility	Emulsifiable
Flash Point	145 °F PMCC
Viscosity	10 SUS @ 75 °F
V.O.C. Content	7.4 lbs./gal.

## Application Procedure

Kleen All is used full strength and is normally manually applied by rag or soaking. A brush, roller or spray gun will work almost as efficiently in some applications if it is scrubbed after application. Good rinsing is usually achieved by going over the work area again with a rag wet with clean water or by spraying down the area normal water pressure, however moderate to high pressures give the best results.

Consult Material Safety Data Sheet for handling and storage instructions before use.
