

Power 99

Power 99 is a moderately alkaline liquid cleaner designed for use in a variety of cleaning operations. Power 99 is used in pressure washers, steam cleaning equipment or floor scrubbers for maintenance cleaning of floors, walls, ovens, heat exchangers and other equipment. It effectively removes paint trackings, grease, oils and a variety of tough soils found in paint shops and other heavy manufacturing plants. Because of its broad range of application Power 99 can replace the duplicity of alkaline cleaners found in many plants. Power 99 is especially formulated to reduce the risk associated with the use of solvents and caustic products for cleaning.

Features and Benefits

- Moderate pH reduces hazard for workers
- Rinses freely and completely to minimize carryover and residue
- Removes a variety of soils at ambient temperatures
- Low VOC for environmental reporting
- Safe for use on aluminized or galvanized oven surfaces

Typical Properties

Appearance	Clear green liquid
Bulk Density	8.75 lbs/gal
Specific Gravity	1.04 @ 70 °F
pH (@ 4% by volume)	11.5
(concentrated)	12.5
Foaming tendency	moderate to high
VOC	0.25 lbs/gal
Flash Point	None to boiling

Application Procedure

Power 99 is used between 2 and 100 % by volume depending on the cleaning requirements and equipment being used. Concentrations of 10 to 50% are generally recommended for manual cleaning at room temperature. Lower concentrations can be used in floor scrubbers and other mechanical cleaning equipment. Oven cleaning usually requires concentrated use.

Consult Material Safety Data Sheet for a complete description of proper handling procedures before use.
